

MAD DOG FACILITY PARTNERS

Operations Coordinator (PMO)

Part-time contractor · 8–10 hrs/week · Mon–Thu · Remote · \$400/mo

ABOUT MAD DOG FACILITY PARTNERS

Mad Dog Facility Partners (MDF) is a service-disabled veteran-owned small business providing janitorial and security staffing services to government, industrial, and correctional facilities across the Phoenix metro area and Midwest. We are a family-owned company with over 20 years of history in Central Illinois and a culture built on reliability, accountability, and people-first leadership.

We are growing and need a sharp, organized coordinator to help keep our team aligned, our pipelines moving, and our operations running without things falling through the cracks.

ROLE OVERVIEW

The Operations Coordinator is the operational backbone of the MDF team. You will own our daily project tracker — logging status updates, adding new adhoc items as they arise, and keeping every active initiative current so leadership always knows exactly where things stand. You will run accountability follow-up after our morning standups, manage our candidate and subcontractor bench pipelines, support the initial phase of recruiting, and step in wherever the team needs a hand to keep things moving.

You do not make strategic decisions — you make sure the people who do never have to ask “where does this stand” on anything. This role reports directly to the CEO and works alongside our operations lead, HR coordinator, and support team.

CORE RESPONSIBILITIES

- Attend or review the daily Teams standup (Mon–Thu) and log each team member’s commitments into the project tracker
- Maintain the project tracker daily — add new adhoc items as they come up, update status notes with date stamps on all active initiatives, and flag anything that is lagging or at risk
- Follow up same-day or next morning on any open items at risk of slipping; escalate Red flags to the CEO via Teams message immediately — do not wait for the next standup
- Own the bench pipeline: conduct outreach and check-ins every 4–6 weeks with post-R1 candidates and vetted subcontractors to confirm availability and interest; keep records current
- Conduct cold call outreach to prospective subcontractors in target markets as directed — introduce MDF, qualify availability and service capabilities, and log qualified subs into the bench tracker by market
- Support the initial phase of recruiting: review incoming applications, conduct first-touch outreach to qualified candidates, and schedule first-round interviews on behalf of the HR coordinator
- Prepare the weekly dashboard summary for Monday and Friday standups — pull Red/Yellow flags, bench counts, and initiative statuses into a clean one-page view
- Log any missed or late tasks into the Accountability Log with date, owner, reason, and resolution
- Offer hands-on support wherever the team is lagging — step in on open tasks, follow up on outstanding items, and proactively identify where things need attention before being asked

WHAT WE'RE LOOKING FOR

- Exceptionally organized — you track details without being asked twice

- Strong written and spoken English — your Teams messages, status notes, and cold calls are clear and professional
- Comfortable on the phone — cold calling subcontractors requires confidence, brevity, and a professional tone
- Proactive communicator — you follow up without needing to be chased and surface problems before they become fires
- Comfortable with Excel — you can maintain a structured project tracker and keep it accurate daily
- Reliable and consistent — this role runs on cadence; showing up on schedule matters
- Experience in operations coordination, virtual assistance, recruiting support, or project support preferred
- Facility services, staffing, or construction industry background a plus but not required
